WATER & ENVIRONMENTAL SOLUTIONS

MWES ANNOUNCE

FULL WATER MONITORING SERVICES TO THE MINING INDUSTRY

MWES now have enhanced capabilities to monitor groundwater and surface water at mine sites in Australia and South-East Asia. This includes setup and reporting of water monitoring requirements matching government and client expectations.

Our Equipment Includes:

- High Accuracy Multi Parameter Probes
- Groundwater Sampling Systems to Utilize Low Flow Techniques
- High Reliability In-Situ - TROLL 9500 Down-Hole Probe

Our Capabilities Are:

- Baseline groundwater & surface water characterization
- Water sampling & monitoring with full QA/QC control & documented procedures
- Cost effective, environmentally friendly low-flow micro-purging groundwater sampling
- Australian & International sampling & monitoring standards
- Water Environmental compliance reports

ACCURATE → COST EFFECTIVE → DEFENSIBLE

ALL SAMPLING & MONITORING REQUIREMENTS
FROM BASELINE TO FINAL REPORTING
