## WATER & ENVIRONMENTAL SOLUTIONS

### MWES ANNOUNCE

ADELAIDE BASED GROUNDWATER AND SURFACE WATER  
HYDROLOGY AND ENVIRONMENTAL CONSULTING SERVICES

MWES offer a wide range of water consulting services to the mining, industrial and agricultural industries. Our team is headed by Gary Meyer who has over 25 year's hydrology and environmental management experience in Australia and SE Asia. His team includes specialists with groundwater and surface water hydrological experience. They particularly specialise in groundwater exploration, mine dewatering, environmental studies, water monitoring and contamination clean-up.

#### Specialised Water and Environmental Service Capabilities Include:

- Water resource management, groundwater exploration & government approvals
- Planning, installation and optimisation of mine dewatering systems
- Surface water catchment flooding characterisation & control
- Baseline & routine environmental water monitoring
- Mine water balance studies
- Environmental risk & liability reports
- Mine & borefield rehabilitation & closure studies

#### Our Capabilities Are:

- Flexible, focussed, experienced & cost effective team of hydrogeologists & specialised technicians
- Full groundwater and surface water monitoring & reporting capabilities
- One stop shop from design to approvals, implementation & long term monitoring
