CONSULTING

## WATER & ENVIRONMENTAL SOLUTIONS

### MWES ANNOUNCE

MWES ARE BUILDING UP THEIR GROUNDWATER AND SURFACE WATER HYDROLOGY AND ENVIRONMENTAL CONSULTING SERVICES TO SE ASIAN COUNTRIES

MWES are based in Perth, Western Australia, and due to frequent contact with companies in the Philippines and Vietnam, we have now completed over 75 projects in SE Asian countries. MWES have the capability to provide high level expertise anywhere in SE Asia at short notice.

#### **Specialised Water and Environmental Service Capabilities Include:**

- Prediction, installation and optimisation of mine dewatering systems
- Mine dewatering using large capacity external production bores
- Surface water catchment flooding characterisation & control
- Baseline & routine environmental water monitoring using local & international standards
- Mine water balance studies
- Environmental risk & liability reports
- Due diligence and feasibility studies

MWES offer a wide range of water consulting services to the mining, industrial, urban development and agricultural businesses. Our team is headed by Gary Meyer who has had over 25 year's hydrology and environmental management experience in Australia and SE Asia.

#### **Our Capabilities Are:**

- Small, focussed, experienced and cost effective team of hydrogeologists and specialised technicians with significant expertise in SE Asia
- Both groundwater and surface water hydrology capabilities
- One stop shop from design to approvals, implementation & long term monitoring
