MWES ANNOUNCE

SPECIALISED WATER CONSULTING SERVICES TO THE WA GOLDFIELDS

MWES specialise in the provision of rapid, cost effective and focussed services to the gold mining industry in Western Australia. Our team is headed by Gary Meyer who has over 25 years mining water management experience in the Eastern Goldfields district. His team includes several geologists and specialists with gold mining, mine dewatering and water supply experience.

Specialised Service Capabilities Include:

- Planning, installation and optimisation of mine dewatering systems
- In-pit drainage design
- Surface water catchment flooding characterisation and control
- Groundwater exploration, borefield installation and optimisation
- Surface water harvesting
- Borefield rehabilitation
- Hydrogeological reports, operating strategies and applications
- Water monitoring reports

Our Capabilities Are:

- Over 25 years of experience in the WA Goldfields
- Small, focussed and cost effective team of hydrogeologists and specialised technicians
- Full groundwater and surface water monitoring and reporting capabilities
- One stop shop from design to approvals, implementation and long term monitoring
